LED Magic Bulb
**4 / 2
 Watt**
 MB4W-A / MB25W

LED MagicBulb

Product Characteristics:

MB4W-A

Wattage: 4W

Type of LED : 50 pcs high luminance diodes

Size: D-70mm, L-107mm (normal)

D-70mm, L-139mm (after pull)

Colour temperature (Kelvin): 2900K-6000K

Weight (gram): 157g

Lumens: 240 lm

Casing material: PC

Light beam angle: 60°

Voltage: AC85V-265V

Socket: E26 or E27

Luminous efficacy: 85 lm/watt

Non-maintained luminous time: 3.5 hours

Certificate: CE, ROHS

Minimum order quantity: 1000 pieces

MB25W

Wattage: 2W

Type of LED : 20 pcs high luminance diodes

Size: D-70mm, L-107mm (normal)

D-70mm, L-139mm (after pull)

Colour temperature (Kelvin): 2900K-6000K

Weight (gram): 114g

Lumens: 112 lm

Casing material: PC

Light beam angle: 60°

Voltage: AC85V-265V

Socket: E26 or E27

Luminous efficacy: 85 lm/watt

Non-maintained luminous time: 1.5 hours

Certificate: CE, ROHS

Functions:

- Bottom switch:** Can be used as a normal light bulb (when electricity supply is on, light stays on. When electricity supply is off, light stays off.)
- Middle switch:** Rapid recharging for the built in rechargeable battery and light will stay off.
- Top switch:** Light always stay on when electricity supply is switched on (but when electricity supply is switched off, light will stay on for 3 hours provided the built in battery is fully charged).
- Can be used as a hand held flash light when built in handle is pulled down from the bottom.

Applicable areas:

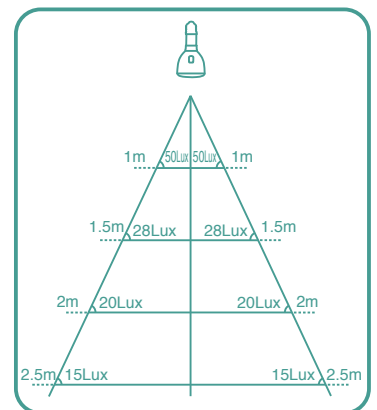

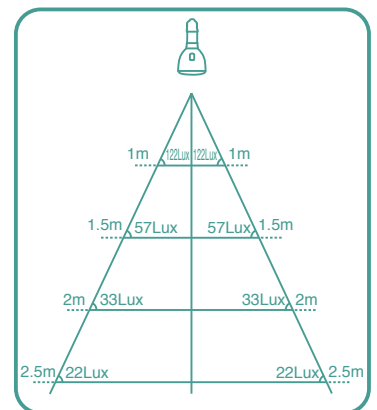

- Replacement for all types of E27 or E26 socket light bulbs and can also turn into a hand held flashlight instantly.
- Can be used as additional emergency light in a blackout situation.
- Suitable for homes and commercial buildings - shops, restaurants, shopping malls, activity centres and offices.

Reduction in energy consumption of lighting has been identified in the beginning of 2009 by McKinsey, a well known analytical firm, as the most cost effective way to achieve significant reduction in CO2 emission worldwide and LED lighting is the best technology to reduce energy consumption in lighting. Our company's goal is to produce highly innovative, high luminance, top quality and environmental friendly LED lighting products which can contribute to fight the global warming problem that everyone of us is currently facing. By converting traditional lighting sources to LED lighting, we are able to save up to 90% energy consumption.

We can save roughly 0.54055kg(*) CO2 by every 1 KW/h energy saved according to the Department of Environment, food and rural affair in UK.
